- Empathy

LANGUAGES

Spanish - Native
English - Advanced

ABOUT ME

I am a doctor who discovered her passion in web designing and developing. I use the skills both of my careers gave me: creativity and critical thinking to create digital solutions. I love learning and working on new challenges and goals. Nowadays I am looking for my first job as a Front End Developer in order to become a little more experienced professional every day.

PROJECTS

Rick and Morty - Location Search App

Project made with React where you can search for different location and it returns that location's information and population. I used useState, useEffect, custom hooks, asynchronous request with Axios, Css animations and styles.

Users List with CRUD

Project made with React where you can add, update or delete users, creating your own users database. I used the React Hook Form library, hooks, css modals, animations and styles.

Weather App

Project made with React that gets your location and shows your city's weather information. You can switch a button either if you want the temperature to be shown in Fahrenheit or Celsius. I used hooks, Api request with Axios, component destructuring and Css styles and animations.

EDUCATION HISTORY

Medical Degree at "Universidad de Buenos Aires"

2009-2015
